# About Us

**ARCO Worldwide Services** is a multi-sector technology company delivering aerial intelligence, security, and data-driven solutions across industries, a subsidiary of Arco Group Plc. ISO 9001:2015 certified. ARCO Worldwide combines deep local expertise with world-class technology to deliver strategic risk mitigation and surveillance solutions across the oil & gas, security, and public sectors. We deliver integrated drone operations, advanced analytics, and sector-focused technology solutions across Nigeria and Africa.

Authorized and Certified by the **Nigerian Civil Aviation Authority** and the **Office of the National Security Adviser**. Our services include Aerial surveillance, Enterprise Drone sales, mapping, infrastructure inspection, precision agriculture, pipeline monitoring, environmental assessment, and integrated security systems. Using advanced sensors and AI-powered analytics, we transform aerial data into actionable intelligence.

**ARCO Aviation Academy (AAA)**, our training arm, builds industry capacity by delivering certified drone pilot training programmes fully aligned with regulatory standards and global best practices.

## Our Vision

To become the leading innovative drone solutions and services provider.

## Our Mission

We help our clients grow through quality and efficient drone technology solutions.

## Our Core Values

Innovation

Quality Delivery

Accountability

Customer-centric

Effective Communication

Safety Conscious

## Our Quality Policy

To deliver high quality unique customised solutions that meet or exceed our clients' needs, through clients' engagement, highly skilled and committed workforce, continual improvement of our Quality Management System and adherence to statutory, regulatory and ethical standards

# Our Products

# Our Core Services

These are the service lines that define ARCO Worldwide's technical capability and represent the primary value delivered to clients. They are scalable, repeatable, and applicable across multiple sectors.

## 01 SURVEILLANCE & MONITORING

Persistent aerial surveillance of facilities, perimeters, pipelines, and environmental zones. Delivered using fixed-wing and multi-rotor platforms with optical, thermal, and multispectral payloads. Applicable across Government, Oil & Gas, Defense, Security, Energy, and Mining.

## 02 INSPECTION SERVICES

Precision inspection of assets that are difficult, dangerous, or expensive to access by conventional means. This includes Non-Destructive Testing (NDT) using thermal cameras, flare stack inspection, confined space inspection using the Flyability Elios 3, and Remote Internal Testing (RIT) for pipelines and vessels.

## 03 DATA CAPTURING

High-resolution data acquisition using LiDAR sensors, thermal imaging cameras, and multispectral payloads. This service line provides the raw intelligence that feeds into all downstream data processing services.

## 04 DATA PROCESSING & ANALYTICS

Transformation of raw aerial data into actionable intelligence. Includes topographic mapping, 3D modelling, volumetric analysis, and advanced analytics. Delivered as structured reports, interactive dashboards, or data feeds into client operational systems.

## 05 SPATIAL INTELLIGENCE

The highest-value service tier translating processed data into permanent, living operational intelligence assets. Includes digital twin development (persistent virtual replicas of physical assets), reality capture (photorealistic 3D models), and geospatial insight reports and dashboards.

## 06 DRONE PROCUREMENT, MAINTENANCE & REPAIR

We offer a range of reliable drone services with quality repair work, top-level maintenance and speedy procurement for your project.

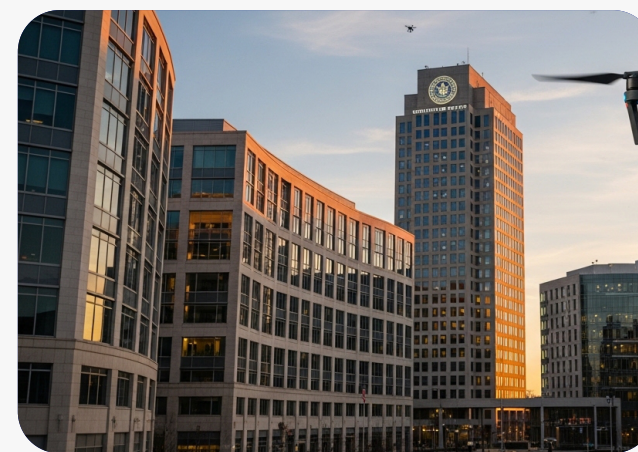

# Industries We Serve

**OIL AND GAS**

**DEFENCE & SECURITY**

**GOVERNMENT AGENCIES**

**CONSTRUCTION, INFRASTRUCTURE,  
POWER & TELECOMS**

**MARITIME & OCEAN  
EXPLORATION**

**AGRICULTURE & FORESTRY**

**MINING & EXPLORATION**

**MEDIA & ENTERTAINMENT**
